## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Russell US Patent No. 6,290,713 in view of Wyatt et al. US Patent No. 6,967,309.

Russell discloses a treatment device for treating a patient's body, the apparatus comprising: a flexible sheet, a plurality of optical fibers disposed within the flexible sheet, and plurality of metal conductor and dielectric substrates bonded together by adhesive material. Russell does not teach the use of silver foil or wire as claimed. However, the use of different metallic wires/foils, such as silver or copper wires, for conducting heat or electrical energy is known in the art. Wyatt et al. disclose a flexible treatment apparatus comprising, the apparatus comprising plurality of optical fibers and heat/electrical conducting wires such as silver or copper wires. Hence, at the time of the applicant's invention, it would have been obvious to one of ordinary skill in the art to modify Russell in view of Wyatt et al. and use silver wires as an equivalent alternative conducting wires.

With respect to claims 5-12, Russell does not teach the length of the optical fibers or black lines disposed on the surface of the flexible sheet. However, the

applicant's written description fails to teach that the recited lengths of the optical fiber or black lines disposed on the sheet provide an advantage or solve an stated problem. Hence, at the time of the applicant's invention, it would have been obvious to one of ordinary skill in the art to dispose optical fibers of different length within the flexible sheet to provide the illumination light. It would have been further obvious to one of ordinary skill in the art to put marking on the flexible sheet for measurement purposes.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Meserol, US Patent No. 6,231,593, discloses a treatment apparatus comprising: a flexible pad, a plurality of optical fibers disposed within the flexible pad, and a reflective foil adhered to the internal surface of the pad (see Fig. 2).
